## Electronic Customs Clearance

The e-customs procedure is available around the clock

### Services & features

- the e-customs procedure consists of approx. 30 different applications
- end-to-end electronic interactions between the customs administrations of the EU member states, the EU Commission and companies
- the company makes the customs declaration
- customs clearance is completely paperless
- the modernization of the e-customs applications is planned or already being implemented as part of the EU Customs Code program

### Facts & figures\*

- The Federal Computing Center (BRZ) is responsible for the development and operation of 30 e-customs applications
- 1,200 companies are connected to the electronic customs clearance system
- 4.5 million customs declarations are registered per year
- This corresponds to a daily processing of:
  - 485,000 national messages
  - 8,000 international messages

### Benefits & advantages

- fast availability of the goods
- efficient deployment of personnel
- risk-oriented controls
- cost savings for customs administration and companies
- available 24/7
