eAusweise & Digital Driver's License

Austria's first digital identification document

Services & features

- with the digital driver's license, citizens can provide identification at an inspection using their smartphone and the app eAusweise
- during inspection, citizens show a QR-code to the police which can be scanned through an application to prove the identification
- citizens are also able to check on other people's digital license by using the app eAusweis-Check or by using the respective function from the app eAusweise
- more features for the app eAusweise, such as digital formats of the vehicle registration certificates (KFZ-Zulassungsschein) or railway pass (Klimaticket), are currently being evaluated

Facts & figures*

- **200,000 people** are already using the digital driver's license – this figure set to increase in the future
- you must meet two criteria to be able to use the app eAusweise:
 - activate all functions of ID Austria
 - own a driver's license in credit card format

Benefits & advantages

- citizens no longer a need to carry a physical ID card and can identify themselves through the app at any traffic inspection
- currently more digital identification certificates are in preparation
